

Network rack cabling rewiring price

Article Overview

Rewiring a network rack typically costs between \$150 and \$400 per drop, with total project costs ranging from a few hundred to several thousand dollars depending on complexity and materials.

Cost Breakdown

Per-Drop Pricing:

- Cat6 commercial drops: \$150-\$250 each
 - Cat6A commercial drops: \$200-\$350+ each
 - Isolated finished-wall additions: \$200-\$400 per drop due to labor-intensive retrofitting and wall patching
- Total Project Costs:
- Small rewiring jobs for a single rack may start at \$2,500-\$6,000, depending on the number of cables, ports, and hardware involved
 - Large-scale rewiring, including new patch panels, switches, and multiple racks, can escalate significantly, sometimes exceeding \$250,000 for extensive floor-wide projects

Factors Affecting Price

- Cable Type: Cat6A and fiber optic cables cost more than Cat6 due to higher bandwidth and installation difficulty .
- Installation Environment: Open ceilings or pre-wired walls reduce labor costs, while finished walls, plenum pathways, or after-hours work increase costs .
- Labor and Expertise: Skilled technicians are required for proper termination, labeling, and testing. Labor is often the largest portion of the budget
