

# Nicknames for irregularly shaped cable tray components

## Article Overview

Irregular cable tray components often have informal nicknames like “elbows,” “reducers,” “dropouts,” or “sweeps” depending on their shape and function.

### Common Nicknames and Their Corresponding Components

- Elbows – Used for horizontal or vertical bends in cable trays; installers often call inside vertical bends “up elbows” and outside vertical bends “down elbows” for simplicity (Vertical Bend) .
- Reducers – Components that connect trays of different widths; nicknames include “tapers” or “step-downs” depending on whether the offset is left-hand or right-hand .
- Dropouts – Sections that allow cables to exit the tray to devices or equipment; sometimes called “tees” or “branches” in casual conversation .
- Sweeps – Gentle curves or long-radius bends used to change direction gradually, often referred to as “radius bends” or “long sweeps” .
- Covers and Dividers – Accessories that supplement irregular sections; nicknames include “hats” for covers and “fingers” for dividers that separate cables within a tray .
- Custom Fittings – Irregular or non-standard shapes may be called “specials”, “oddballs,” or “goofies” on job sites, reflecting their unique or one-off nature .

### Notes on Usage

- Nicknames can be regional or trade-specific, so the same component might have different informal names in different areas or among different crews ....
