

Norwegian Distribution Box Dimensions and Specifications

Article Overview

Typical Norwegian distribution boxes for electrical or utility use follow European standards, with dimensions varying by type but generally ranging from compact wall-mounted units to larger substation boxes.

Standard Dimensions

Norwegian distribution boxes, especially those used for residential or small commercial installations, often follow European cable distribution standards. While exact dimensions depend on the manufacturer and type, typical ranges include:

- Small wall-mounted distribution boxes: approximately 370 mm x 270 mm x 160 mm, similar to mailbox-sized enclosures for compact installations .
- Medium-sized distribution boxes: designed for multiple circuits or feeders, dimensions can range from 400 mm to 600 mm in width, 300 mm to 500 mm in height, and 150 mm to 250 mm in depth .
- Large substation or MV (medium voltage) distribution boxes: often used in Norwegian power grids, these can be over 1 meter in height and width, with two-way doors and internal busbar arrangements for 12 kV systems .

Design Considerations

- Mounting: Boxes can be wall-mounted indoors or outdoors, or installed in substations....
