

Overhead cable trays can be customized

Article Overview

Overhead cable trays can be fully customized to meet specific layout, support, and environmental requirements.

Design Flexibility

Overhead cable trays are highly adaptable systems that can be configured for a wide range of applications. They can be designed to navigate complex ceiling spaces, accommodate bends, drop-outs, and elevation changes, and integrate with existing infrastructure without requiring field modifications . Custom layouts consider hanger spacing, rod loads, clearances, and fire code compliance to ensure safe and efficient installation .

Material and Finish Options

Cable trays are available in various materials and finishes to suit different environments. Common options include welded steel mesh, powder-coated finishes (black or white), and electro-zinc plating, providing corrosion resistance and structural integrity for commercial, industrial, and data center applications . These options allow trays to withstand environmental conditions while maintaining durability and ease of maintenance.

Custom Fabrication

Manufacturers can produce cable trays to exact dimensions and specifications, based on drawings, sketches, or samples. This enables precise fit for new installations or r...
