

Papua New Guinea Telecom-Grade Router DML

Article Overview

Telecom-grade routers in Papua New Guinea are primarily deployed by DataCo and major MNOs to support the National Transmission Network and enterprise-grade connectivity.

Overview of PNG Telecom Infrastructure

Papua New Guinea's telecom sector is supported by a combination of fibre-optic networks, satellite systems, and mobile networks. The National Transmission Network (NTN), operated by PNG DataCo, spans over 7,000 km of terrestrial and submarine fibre, with multiple Points of Presence (PoPs), Internet Gateway Nodes, and DWDM PoPs across 20 provinces. This infrastructure provides the backbone for high-capacity, low-latency connectivity, which is essential for telecom-grade routers used in enterprise, MNO, and government networks.

Role of Telecom-Grade Routers

Telecom-grade routers in PNG are designed to handle high throughput, redundancy, and multi-service traffic including voice, data, and video. They are typically deployed at:

- Fibre PoPs and gateway nodes to manage traffic between international and domestic networks.
- Enterprise and government facilities requiring secure, high-capacity connections....
