

PoE Switch Huawei Core

Overview

The Huawei S5720H series represents a powerful line of gigabit switches designed for enterprise campus core and distribution networks. Based on Huawei's VRP V200 operating system, it blends high forwarding performance, PoE+ capability, rich port options, and advanced. Huawei's comprehensive portfolio of products and solutions enables you to realize smooth digital transformation and rapid growth of virtualization, Big Data, and cloud services. Huawei switches already help customers achieve success in industries such as finance, Internet, retail, education. Huawei campus switches are ideal for building future-proof campus networks with simplified management, high reliability, and service intelligence, across industries such as enterprises, governments, education, finance, and manufacturing. Huawei's CloudEngine campus family pushes Power over Ethernet to the limit: from 15 W PoE and 30 W PoE+ all the way to 60 W PoE++ (IEEE 802.3bt Type 3) and 90 W. Every time you scramble to plug in a new wireless presenter before a board meeting, every time a high-resolution security feed stutters, every time you delay deploying a crucial IoT sensor because it needs AC power just out of reach – that reliable POE switch is quietly boxing you in.
