

Price Comparison of Ladder-type and Tray-type Cable Trays

Article Overview

Ladder-type cable trays typically cost around \$50–\$150 per 2.4-meter section depending on material, while tray-type (solid or perforated) trays vary from \$40–\$120 per section.

Ladder-type Cable Trays

Ladder-type cable trays feature side rails with rungs that allow cables to enter and exit at any point, promoting airflow and preventing overheating. They are commonly made from hot-dip galvanized steel, aluminum, or stainless steel. Standard lengths are usually 2.4 meters, and prices for hot-dip galvanized ladder trays range from \$50 to \$150 per section, depending on width, load capacity, and material quality . Accessories and fittings such as elbows, tees, and brackets are priced separately, typically \$10–\$50 per piece .

Tray-type Cable Trays

Tray-type cable trays, also called solid or perforated trays, provide a continuous surface for cable support. They are ideal for smaller cables, sensitive instrumentation, or environments requiring dust protection. Materials include galvanized steel, aluminum, and FRP composites, with prices generally ranging from \$40 to \$120 per 2.4-meter section, depending on material, width, and perforation pattern . Fittings and brackets are sold separately and can add to the overall cost....
