

Price of Fireproof Cable Tray Supports

Article Overview

Fireproof cable tray supports typically range from \$20 to \$150 per bracket or support, depending on material, fire rating, and load capacity.

Factors Affecting Price

Material: Stainless steel (304/316) and specialized aluminum alloys are more expensive than galvanized or powder-coated steel due to higher corrosion resistance and strength-to-weight ratios. Composite or fiberglass options may also command premium pricing for specialized applications.

Fire Resistance Rating: Supports rated for 60, 90, or 120 minutes of fire resistance cost more as higher-rated products require rigorous testing and certification. Certifications from UL, CE, or LPCB further influence cost.

Load Capacity and Design: Heavy-duty supports designed for large cable loads or long spans are priced higher. Modular or adjustable designs that simplify installation can also increase cost.

Supplier and Region: North America and Europe often have higher prices due to stringent quality standards, while suppliers in Asia or the Middle East may offer lower-cost options with comparable specifications.

Typical Price Ranges

- Standard galvanized steel supports: \$20–\$50 per unit
- Stainless steel 304/316 supports: \$50–\$120 per unit
- High fire-rated or heavy-duty supports: \$100–\$150 per unit
- Custom or composite material supports: Prices vary widely, often exceeding \$150 per unit...
