

Price of Outdoor Finished Optical Cables

Article Overview

Finished outdoor fiber optic cables typically cost between \$1 and \$6 per foot, depending on fiber type, strand count, and environmental protection.

Typical Price Range

The cost of a finished outdoor optical cable varies widely based on specifications and installation requirements. Per-foot prices generally range from \$1 to \$6, with single-mode fiber usually on the lower end and multimode or high-strand-count cables on the higher end (for example, a 288-strand backbone cable can reach \$6 per foot) . Bulk wholesale purchases may reduce the material cost to \$0.09–\$1.52 per foot, while retail or pre-terminated assemblies are more expensive due to factory termination and connectors .

Factors Affecting Cost

- **Fiber Type and Count:** Single-mode fiber is less expensive than multimode, but higher strand counts increase cost proportionally. A 12-strand cable may cost around \$0.50 per foot, while a 24-strand cable can reach \$1 per foot .
- **Cable Construction:** Outdoor-rated cables, armored cables, and direct-burial designs are more expensive than indoor or riser-rated cables due to additional protective layers .
- **Connectors and Pre-Termination:** Factory-terminated cables with connectors or patch panels add to the cost, sometimes significantly, depending on connector type and number of fibers .
- **Installation Considerations:** Trenching, conduit, splicing, and testing can increase the total project cost. For example, a 1,500-meter outdoor armored fiber run with m...
