

Price of a complete home electrical distribution box

Article Overview

The total cost of a home electrical distribution box typically ranges from \$1,200 to \$6,000, depending on amperage, location, materials, and installation complexity.

Typical Cost Breakdown

- Basic 100-125A Indoor Panel: \$1,200-\$2,500 including the panel, breakers, wiring, and standard installation with permits .
- Mid-Range 150-200A Outdoor Upgrade: \$2,800-\$4,500 for a new main disconnect, meter socket, weatherproof enclosure, and installation over 12-16 hours .
- Premium 200A Outdoor Full Service Upgrade: \$4,500-\$8,000 for complex routing, multiple runs, enhanced surge protection, and advanced safety features .

Factors Affecting Price

- Amperage and Capacity: Higher amperage panels (200A) cost more than standard 100-125A units due to larger components and higher load capacity .
- Indoor vs Outdoor Installation: Outdoor, weatherproof enclosures carry a premium compared to indoor units .
- Materials and Construction: Plastic boxes are cheaper, while powder-coated steel or stainless steel panels increase costs .
- Internal Components: Adding high-quality breakers, surge protectors, and busbars raises the price significantly .
- Labor and Permits: Installation complexity, conduit routing, and local permit fees can add 20-50% to the base cost
