

Price of a single core of optical fiber cable

Article Overview

A single core of optical fiber cable typically costs between \$0.13 and \$0.40 per foot (\$0.40 per meter), depending on fiber type, construction, and application.

Pricing Overview

The cost of one fiber core varies based on several factors:

- **Fiber Type:** Single-mode fiber (OS2) is generally cheaper per core than multimode fiber (OM3/OM4), with single-mode costing around \$0.10–\$0.50 per foot and multimode ranging from \$1.50–\$6.00 per foot for higher-grade cables .
- **Cable Construction:** Indoor cables with PVC or LSZH jackets are less expensive than outdoor or armored cables designed for harsh environments. Armored cables can increase the cost by 20–50% .
- **Strand Count:** Higher strand counts increase the per-foot cost. A simple 1-core FTTH drop cable costs approximately \$0.13 per foot, while large backbone cables with hundreds of cores can reach \$6 per foot .
- **Material Quality:** Glass fiber cores are standard for high-speed, long-distance transmission and cost more than plastic optical fibers .

Practical Examples

- **FTTH Drop Cable (1 core):** ~\$0.13 per foot or ~\$0.40 per meter .
- **12-core Single-mode Cable:** ~\$0.50 per foot...
