

Price of cable tray combined support

Article Overview

Combined cable tray supports typically range from \$10 to \$150 per unit depending on material, size, and load capacity.

Overview

Combined cable tray supports are brackets or hangers used to secure cable trays at various points of installation, ensuring proper routing and support for electrical and data cables. They are essential in commercial, industrial, and residential wiring systems to prevent sagging, maintain organization, and comply with safety standards.

Price Factors

- **Material:** Supports can be made from galvanized steel, stainless steel, or plastic, with stainless steel generally being the most expensive due to corrosion resistance.
- **Type and Design:** Options include wall-mounted brackets, ceiling hangers, or adjustable supports. Heavy-duty supports for ladder trays cost more than light-duty supports for wire mesh trays.
- **Size and Load Capacity:** Larger supports designed for heavier cable loads or longer spans are priced higher. Standard small supports for office or home use may start around \$10-\$20, while industrial-grade supports can reach \$100-\$150 or more.
- **Brand and Supplier:** Prices vary by manufacturer. Brands like Legrand, Schneider Electric, and Phoenix Contact are typically higher-end, while generic or Amazon-listed supports may be more affordable.
