

Price of fiber optic patch panels without jumpers

Article Overview

Empty fiber optic patch panels typically range from \$50 to \$300 depending on port count, type, and vendor.

Overview

Fiber optic patch panels without jumpers, also called empty or blank panels, are designed to organize and terminate fiber cables while allowing custom termination in the field. They do not include pre-installed pigtails or jumpers, giving flexibility for network setups and maintenance.

Price Ranges

- Low-density panels (12-24 ports): Usually cost \$50-\$100. These are suitable for small office or low-traffic installations.
- Medium-density panels (36-48 ports): Typically priced around \$100-\$200, offering a balance between capacity and cost.
- High-density panels (72-144 ports): Can range from \$200-\$300 or more, depending on rack size (1U, 2U), adapter type (LC, SC, ST), and single-mode or multimode compatibility.

Factors Affecting Price

- Port Count: More ports increase the cost due to larger frames and more adapter slots....
