

Price of flame-retardant panels for installing electrical distribution boxes

Article Overview

Flame-retardant panels for electrical distribution boxes typically range from \$20 to \$150 per panel, depending on size, material, and certification.

Typical Pricing

- Small residential or meter boards (e.g., 600mm x 450mm x 12mm) are priced around \$20–\$50 per unit, suitable for mounting electric meters or consumer units in homes or small commercial spaces (PECLights) .
- Industrial-grade flame-resistant insulation boards made from SMC composite materials or fiberglass-reinforced sheets can cost \$50–\$150 depending on thickness, size, and heat-resistance rating (Amazon COYOU CO SMC boards) .
- Explosion-proof or high-risk environment panels designed for industrial applications may exceed \$200–\$500 due to reinforced construction, certifications, and corrosion-resistant materials (Intrinsically Safe Store) .

Factors Affecting Cost

- Material: Fiberglass, SMC composite, or polycarbonate boards vary in price; reinforced or high-dielectric materials are more expensive.
- Size and Thickness: Larger panels or thicker boards increase material costs and shipping fees.
- Certifications: Compliance with fire safety standards (e.g., NFPA 70, IEC 61439, UL 94) can raise the price.
- Application: Residential panels are generally cheaper, while industrial or hazardous...
