

Price of self-supporting butterfly-shaped drop optical cable

Article Overview

The price of self-supporting butterfly-shaped drop optical cable ranges from approximately \$0.01 to \$0.13 per foot, depending on purchase scale, core count, and sourcing method.

Pricing Overview

- **B2B Wholesale Pricing:** Large-scale buyers sourcing directly from manufacturers, such as on Alibaba, can obtain duct-type self-supporting butterfly drop cables at \$0.01 to \$0.03 per meter, reflecting bulk purchase discounts and direct-to-manufacturer pricing models .
- **B2C or Retail Pricing:** Smaller quantities or consumer-focused platforms, like Amazon, typically see prices around \$0.28 per meter for a 100-foot cable, which is higher due to packaging, distribution, and lower purchase volumes .
- **Per-Foot Estimates:** For standard 1-core FTTH drop cables, the cost is approximately \$0.13 per foot, aligning with typical wholesale material pricing for self-supporting designs .

Factors Affecting Price

- **Core Count:** Single-core cables are cheaper, while multi-core (2-4 cores) cables increase the per-unit cost due to additional fiber and structural materials .
- **Material and Construction:** Self-supporting designs include metal or FRP strength members, LSZH or PVC sheaths, and bend-insensitive fibers, which influence cost. For example, G.657A1 bend-insensitive fiber traded at around \$22 per kilometer in earl...
