

Price of single-core optical distribution box for Liechtenstein LAN

Article Overview

A single-core optical distribution box typically costs between €15 and €40, depending on the manufacturer, material, and configuration.

Overview

Single-core optical distribution boxes are designed to protect and manage a single optical fiber in LAN or FTTx deployments. They are commonly used for FTTH, FTTB, or in-building LAN networks, providing a secure point for splicing, branching, or terminating fiber cables . These boxes are made from durable materials like ABS+PC, often rated IP65 for dust and water resistance, suitable for both indoor and outdoor installations .

Features to Consider

- **Material and Durability:** High-impact ABS+PC ensures long-term protection for delicate fiber splices .
- **Mounting Options:** Wall-mounted, pole-mounted, or cabinet-mounted depending on network layout .
- **Connector Compatibility:** Supports common connectors such as LC, SC, or ST .
- **Environmental Protection:** Dustproof, waterproof, and UV-resistant for outdoor use .
- **Internal Structure:** May include splice trays, adapter brackets, or splitter trays for flexible fiber management
