

Price range for 2-core single-mode fiber

Article Overview

The cost of a 2-core single-mode fiber optic cable typically ranges from \$0.10 to \$1.50 per foot, depending on construction, jacket type, and application.

Typical Pricing

- Bulk cable costs: Single-mode fiber cables generally cost \$2.00 to \$7.00 per foot for standard bulk cables, with variations for pre-terminated or armored options .
- Retail and wholesale ranges: For 2-core single-mode fiber, prices can be as low as \$0.10 per foot for basic indoor cables and up to \$1.50 per foot for specialized outdoor or armored cables .
- Pre-terminated assemblies: Factory-terminated cables with connectors are more expensive due to labor and quality assurance, often adding \$0.50 to \$2.00 per foot depending on connector type and fiber count .

Factors Affecting Cost

- Cable Construction: Tight-buffered or loose-tube designs, armored versus non-armored, and bend-insensitive fibers influence pricing .
- Jacket Material: Indoor PVC or LSZH jackets are cheaper, while outdoor PE or UV-resistant jackets increase cost .
- Installation Environment: Direct-burial or aerial-rated cables require additional protection, raising the price by 20-50% for armored versions .
- Volume Discounts: Purchasing in bulk (e.g., >10 km) can reduce per-foot costs by 20-40% .
- Supplier and Region: Shipping and compliance requirements can add 5-15% to the total cost for international orders
