

Price range of circuit breaker distribution boxes

Article Overview

Circuit breaker distribution boxes typically range from \$50 for basic residential units to over \$2,000 for industrial or smart systems.

Residential Distribution Boxes

For standard residential applications, prices generally start around \$50 to \$200 for small, single-phase plastic or metal enclosures with basic circuit breakers. These units are suitable for apartments, small homes, or light electrical loads. The cost increases if the box includes additional features such as surge protection, modular expansion, or higher amperage ratings.

Commercial and Industrial Units

Commercial and industrial distribution boxes are larger, often three-phase, and built with durable materials like powder-coated steel or stainless steel. Prices typically range from \$500 to \$2,000 or more, depending on the number of circuits, amperage capacity, and environmental protection (e.g., IP-rated for outdoor use). High-end industrial units may include integrated monitoring, remote control, and smart energy management features, which can further increase costs.

Factors Affecting Price

- Material of Enclosure: Plastic, standard steel, or stainless steel significantly affects durability and cost
