

Raw materials for Palau cable trays

Overview

Here are the most common materials: Galvanized Steel – Provides high corrosion resistance and durability. Stainless Steel – Ideal for harsh environments with chemical exposure. Aluminum – Lightweight, rust-resistant, and easy to install. Cable Trays are designed to meet most requirements of cable and electrical wire installations and comply to local and international standards of fabrications and finishes. SFSP cable trays and accessories from SFSP are manufactured from steel sheets in accordance with BS EN 10130/BS EN 10131/ BS EN. Selecting the right raw material for cable trays is vital to maintaining structural integrity, longevity, and cost efficiency. We also. ECTRAY offer a wide range of perforated cable trays which are fabricated using quality raw material such as Zinc Aluminum Magnesium (ZAM). It's strong, durable, and can withstand a lot of wear and tear. These materials perform very well at ambient temperatures (0°F to 100°F).
