

Recommended Standard Electrical Distribution Boxes in Argentina

Article Overview

Electrical distribution boxes in Argentina should comply with Resolution No. 16/2025 and relevant IEC, IRAM, or EN standards, ensuring safety and quality for single-phase or three-phase installations.

Regulatory Compliance

In Argentina, all electrical distribution boxes must meet the quality and safety standards established by Resolution No. 16/2025, which is part of the broader regulatory framework for electrical equipment introduced under Resolution No. 237/2024 . Compliance requires adherence to technical standards from recognized bodies such as IEC, IRAM, and EN, and products may need certification under one of the conformity assessment schemes (1b, 2, 3, 4, or 5) depending on their intended use . This ensures that distribution boxes are safe for residential, commercial, and industrial applications.

Types and Specifications

Electrical distribution boxes in Argentina are available in single-phase and three-phase configurations, with options for direct or indirect supply, and may include protective features for enhanced safety . Key specifications to consider include:

- **Material and durability:** Boxes are typically made from high-quality metals or reinforced plastics suitable for indoor or outdoor use....
