

Router with fiber optic cable output

Article Overview

Fiber optic routers are designed to connect directly to an Optical Network Terminal (ONT) and support high-speed internet with multi-gigabit LAN ports and advanced Wi-Fi standards.

Key Features of Fiber-Ready Routers

A router suitable for fiber optic internet must meet several criteria:

- **High-Speed Capability:** Support for at least Gigabit Ethernet (1000 Mbps) to match fiber speeds, with some routers offering 2.5G or 10G LAN/WAN ports for multi-gig plans .
- **WAN Port for ONT:** A dedicated WAN port connects to the ONT, which converts the fiber signal into data usable by the router .
- **Advanced Wireless Technology:** Wi-Fi 6, 6E, or Wi-Fi 7 standards ensure fast, low-latency wireless connections across multiple devices .
- **Built-in Modem or Fiber-Compatible ONT:** Some routers include an integrated optical interface to process fiber signals directly, eliminating the need for a separate ONT .

Recommended Fiber Optic Routers

- NETGEAR Nighthawk RS700S (Wi-Fi 7 Tri-Band)
- Max Speed: 19 Gbps
- Ports: 1× 10Gbps WAN, 1× 10Gbps LAN, 4× 1Gbps LAN
- Coverage: Up to 3,500 sq. ft.
- Ideal for high-performance homes, gaming, and 8K streaming
