

Secondary and tertiary enclosures for electrical assembly boxes

Overview

Primary Distribution Box: Serves as the main distribution box for a construction site or project (usually only one). Let's make an example for clarity: A newly constructed residential area introduces a 10kV power line to a substation. From the transformer's low-voltage side (0. These boxes have inner and outer doors, powder-coated exteriors, and are designed for safety and aesthetic appeal, with rainproof tops for outdoor work. Sort our electronics box range by manufacturer, series, and dimensions with the standard filters, or toggle to the advanced filtering view for a wider range of technical specs and product.
