

Signage and Distribution Box

Article Overview

Signage systems display information or branding, while distribution boxes manage electrical or signal distribution safely and efficiently.

Signage Systems

Signage refers to visual displays used for branding, directions, or information. Signage can be illuminated or non-illuminated, wall-mounted, hanging, or projected. Key types include:

- **Illuminated Sign Boxes:** Lighted enclosures that enhance visibility day and night, often using LED lighting. Ideal for storefronts, offices, and commercial buildings .
- **Non-Illuminated Sign Boxes:** Sleek enclosures without lighting, suitable for indoor or outdoor professional displays .
- **Double-Sided Sign Boxes:** Display signs on both sides for high-traffic areas like streets or malls .
- **Custom Shape Sign Boxes:** Tailored to specific branding or architectural requirements . Signage companies, such as Sign House Co., Ltd in Hong Kong, also provide structural calculations and building department approvals for large outdoor signs and light boxes, ensuring compliance with local regulations .

Distribution Boxes

Distribution boxes are enclosures that house electrical or signal components, enabling safe and organized distribution of power, data, or control signals. They are used in residential, commercial, and industrial applications. Key features include:...
