

Simple Tools for Pulling Fiber Optic Cables

Article Overview

Simple fiber optic cable pulling can be accomplished using lightweight pullers, pulling socks, and basic hand tools designed to protect the cable during installation.

Lightweight Cable Pullers

For small-scale or less demanding installations, portable cable pullers are ideal. Options include the TUF-Lugger Lite Cable Puller, which can be powered by a gas or electric winch, providing a simple, lightweight, and cost-effective alternative to hydraulic pullers, while maintaining control over cable tension . These pullers accommodate standard sheaves and are designed to respect the minimum bend radius of fiber optic cables.

Pulling Socks and Eyes

Pulling socks and eyes are essential for safely attaching fiber optic cables to the pulling line. The Cleerline SSF-PULLEYED and SSF-PULLEYEM kits use PVC-jacketed aramid yarns and rotating clips to reduce twisting and protect the cable during the pull. The SSF-PULLEYEM also includes an aluminum locking nut to secure the cable's strength member, ensuring only the strongest part of the cable bears tension .

Basic Hand Tools

For preparation and minor adjustments, basic fiber optic tool kits are useful. These...
