

Singapore Flame-Retardant Cable Tray Supplier

Article Overview

Ferrotech and AE Hub are among the top flame-retardant cable tray suppliers in Singapore, offering high-quality FRP/GRP systems with fire safety compliance and durability.

Leading Suppliers

Ferrotech specializes in FRP (Fiberglass Reinforced Plastic) cable tray systems that are fire-retardant, corrosion-resistant, and UV-resistant, making them ideal for harsh industrial environments such as chemical plants, refineries, and marine applications. Their trays are manufactured from premium fire-retardant resins and reinforced with fiberglass, providing high strength and non-conductive properties. They offer both Isophthalic Polyester (IFR) and Vinyl Ester resin options, meeting stringent fire safety standards (Class 1 rating according to ASTM E84) and supporting heavy cable loads while maintaining structural integrity. AE Hub supplies FRP/GRP cable trays and ladders that are flame-retardant, halogen-free, and UV-resistant. Their products comply with NEMA FG-1 and ASTM E-84 standards, suitable for outdoor and industrial applications. The lightweight, chemical-resistant, and corrosion-resistant properties make them a reliable choice for long-term cable management. Foresight Metal Engineering While primarily focused on metal cable trays, trunkings, and ladders, Foresight Metal Engineering provides robust solutions for commercial and industrial projects. They offer extensive technical support and a wide range of products suitable for pharmaceutical, medical, and marine industries, though their flame-retardant offerings are more limited compared to FRP suppliers
