

Single-row 24-circuit distribution box

Article Overview

A single-row 24-circuit distribution box provides space for 24 modular units, such as circuit breakers, in a compact, safe, and organized enclosure suitable for residential or commercial electrical installations.

Key Features

- Capacity: Designed to accommodate 24 TE (division units), where 1 TE equals 17.5 mm, allowing installation of up to 24 single-pole circuit breakers in one row .
- Material: Typically made from high-quality ABS or PC plastic, offering excellent impact resistance and flame retardancy .
- Protection Class: Commonly rated IP40 for indoor dry environments or IP65 for outdoor and dust/water-resistant applications .
- Mounting Options: Available in surface-mounted or flush-mounted designs, depending on installation requirements .
- Included Components: Often supplied with N and PE terminals, fixing materials, and installation instructions for quick setup .
- Compatibility: Supports standard modular devices such as MCBs, RCDs, fuses, and electricity meters .

Applications

- Residential: Power distribution for lighting, heating, and household appliances .
- Commercial: Office equipment, HVAC systems, and lighting networks .
- Industrial/Automation: Control panels, photovoltaic (PV) combiner boxes, and outdoor lighting systems
