

Sliding 24 Fiber Optic Distribution Frame

Article Overview

A Sliding 24 Fiber Optic Distribution Frame (ODF) is a 1U rack-mountable unit designed for organized fiber cable management, supporting up to 24 fibers with slide-out access for easy installation and maintenance.

Key Features

- **Rack Compatibility:** Fits standard 19" or 23" racks and cabinets, making it suitable for both wall-mounted and rack-mounted installations .
- **Sliding Mechanism:** Equipped with metal sliding fittings and self-locking functions, allowing the drawer to slide out safely for easy access to cables and splice trays .
- **Material and Build:** Constructed from high-quality cold-rolled steel with durable powder-coated or electrostatic finish for long-term durability and protection of fibers .
- **Port and Adapter Options:** Supports FC, SC, ST, and LC adapters, with configurations for SC Simplex, LC Duplex, or E2000 connectors .
- **Cable Management:** Includes multiple cable entry points (typically 4) for loose tube, tight buffer, pre-terminated, or armored cables, along with integrated strength member tie positions to secure cables .
- **Splice Tray Integration:** Pre-loaded with splice trays to accommodate fiber splicing, maintaining proper bend radius and protecting fiber integrity .

Benefits

- **Efficient Maintenance:** The sliding design allows technicians to access fibers without removing the entire panel, reducing downtime and simplifying troubleshooting .
- **Organized Network Management:** Centralizes fiber connections, making it easier t...
