

Slovakian Long-Span Cable Tray Construction

Article Overview

Slovakian long-span cable trays are typically galvanized steel ladder or perforated types, designed for high load capacity, corrosion resistance, and industrial long-distance cable routing.

Material and Construction

Slovakian cable trays are generally made from galvanized steel, providing superior durability and corrosion resistance, even in harsh industrial environments . The trays are manufactured to ensure smooth edges and no burrs, preventing damage to cable insulation . Some systems also use stainless steel or aluminum for specialized applications .

Types and Dimensions

- Ladder trays: Open rungs for maximum ventilation and cable support.
- Perforated trays: Solid bottom with perforations for airflow and cable protection.
- Widths: Typically 200-600 mm.
- Side heights: Usually 110-200 mm for long-span systems .
- Lengths: Straight sections are available in standard lengths, with custom options for long spans.
