

South African optical cable survey instrument manufacturer

Overview

Lambda Test Equipment is South Africa's primary supplier of optical fibre test equipment and associated optical fibre preparation tools and accessories. When combining the power of GNSS RTK Positioning and SLAM LiDAR Scanning, surveyors can work in both outdoor and indoor environments, performing contact or non-contact measurements according to their work need, to tackle tasks they couldn't accomplish previously. AI-8/9 use the latest core alignment technology with auto focus and six motors, it is a new generation of fibre fusion splicer. It is fully qualified with trunk construction of medium and short distance, FTTH project, security monitoring and other fibre cable splicing projects. All instruments in for service are :- Stripped completely - Not externally cleaned & charged for full service Ultra sonically cleaned -. ETHERLINE® GUARD is a stationary monitoring device that evaluates the current performance of a data cable and indicates it as a percentage. Find our Catalogues in a downloadable pdf format.
