

Specifications and Models of Philippine Distribution Boxes

Article Overview

Philippine distribution boxes are available in various models, materials, and protection levels, ranging from 3-way to 24-way configurations with IP65 waterproof ratings.

Common Models and Configurations

Distribution boxes in the Philippines are typically categorized by the number of ways or circuits they can accommodate:

- 3 to 11-way boxes for smaller residential or light commercial applications
 - 5, 8, 12, 15, 18, 24-way boxes for larger residential, commercial, or industrial setups
- Each model is designed to house circuit breakers, fuses, or other electrical components safely.

Material and Construction

- **Plastic Distribution Boxes:** Made from HA and HT plastics, these boxes are flame retardant and provide good waterproof performance. They are suitable for household and photovoltaic applications .
- **Steel Distribution Boxes:** Made from pre-galvanized steel, often with bronze terminals, these are used for residential, commercial, and industrial installations, including wall or ceiling-mounted lighting and junction boxes
