

# Supply price of distribution boxes and meter boxes

## Article Overview

Distribution boxes typically range from \$50 to \$500 per unit depending on specifications, while meter boxes range from \$30 to \$300, with prices influenced by size, material, and smart features.

### Distribution Boxes Pricing

The price of distribution boxes varies widely based on specifications, customization, and order volume. Standard units for residential or small commercial use generally start around \$50-\$150 per unit, while larger industrial or modular boxes can cost \$200-\$500 or more . Factors affecting price include:

- Material and durability: Metal or IP-rated enclosures cost more than basic plastic units.
- Customization: OEM branding, busbar modifications, and cable entry options increase cost.
- Order volume: Wholesale or bulk orders reduce per-unit pricing.
- Compliance and safety standards: Boxes meeting stringent electrical safety regulations may carry a premium . The global distribution box market is projected to grow from USD 4.2 billion in 2023 to USD 7.8 billion by 2032, reflecting rising demand for reliable power distribution in urban and industrial infrastructure .
