

Swedish long-distance jumper wire low loss directly supplied by manufacturer

Article Overview

For high-quality, low-loss long-distance jumper wires from Sweden, manufacturers like Habia, Reka Kabel, and Elspec provide direct supply options suitable for demanding RF and industrial applications.

Recommended Swedish Manufacturers

Habia specializes in customized high-performance cables and harnesses, including low-loss wires suitable for telecommunications, defense, and industrial applications. They can design and manufacture cables to meet specific signal integrity and low-attenuation requirements, ensuring reliable long-distance transmission . Reka Kabel produces high-quality power and signal cables engineered for durability and minimal loss, making them suitable for construction, energy distribution, and industrial networks . Elspec Group offers low-loss RF coaxial cables designed for long-distance signal transmission with minimal attenuation. Their 142 Series, for example, supports frequencies up to 18 GHz (special solutions up to 26.5 GHz) and provides robust shielding, phase stability, and flexible installation options . Molex provides RF jumper cables with shielded, corrugated designs that minimize signal loss and interference, ensuring high-quality transmission for antennas, transmitters, and receivers. These cables are engineered for harsh outdoor environments and can be supplied directly from the manufacturer .

Key Features to Consider...
