

Switch with 2 fiber optic cables per group of interfaces

Overview

What is a 2 fiber port 8 LAN port fiber optic Ethernet switch?

It is a hybrid Ethernet switch that integrates two SFP fiber ports (1. 25 Gbps) and eight RJ45 UTP ports (10/100/1000 Mbps), enabling seamless conversion between fiber and copper networks. Simply put, it defines how network. I need to connect 4 Floor Building with 4 Cisco 2960 - 48 ports switch each other and it needs to be through a fiber. (attached is the image here with) I see that the 2960 has 2 SFP ports each port of each switch. IEEE 802. The LAG balances. Most modern fiber-enabled network switches require an SFP transceiver module featuring a duplex (two strand) multimode OM3 or duplex single mode OS2 connection with LC connectors. Our high-performance Fiber Optic Ethernet Switch with 2 Fiber Ports & 8 UTP LAN Ports is designed to provide reliable and secure networking solutions for businesses and organizations. Various port sizes are available ranging from 4 up to 52 ports.
