

The fiber optic router is no longer displaying its lights

Overview

If no lights are illuminated on your fiber router it's likely not powered on: Confirm that the power cord is securely connected from the Power port on the back of the router into a working electrical outlet. On the back of the router, check the On/Off button to confirm that it's. The lights on your ONT are typically LED indicators that display different colors and patterns to convey information about the device's status. The most common colors used are: The Power light is usually the first light to check when troubleshooting your ONT. This light indicates whether the device. Understanding LED Indicators on a Fiber Router Let's break down what the common LED lights on a fiber router mean and how they behave: 1. POWER Normal: Solid/stagnant light. No Light: The ONT is not receiving power.
