

Weak current box in the distribution box

Overview

Weak current boxes (also known as low-voltage electrical boxes) are mainly used to distribute and control low-voltage signals and data transmission equipment, such as telephone lines, network lines, monitoring systems, etc. The invention discloses a strong and weak current comprehensive distribution box, which relates to the technical field of strong and weak current and comprises a box body, wherein the bottom surface of the box body is fixedly connected with a base, the front side of the left end of the box body is. The distribution box is to assemble the switchgear, measuring instruments, protective appliances and auxiliary equipment in a closed or semi closed metal cabinet or panel according to the electrical wiring requirements to form a low-voltage distribution device. During normal operation, the circuit. Weak electric box and strong electric box are two different types of electric boxes used for power distribution and control. com has. In 2017, Suzhou Zhuwei Electrical Equipment Co. Was established in Jiangsu, China, leveraging over a decade of specialized experience in sheet metal fabrication.
