

West Asia Telecom Fiber Optic Cable Fault

Overview

A critical incident unfolded in early September 2025 when multiple submarine fiber optic cables in the Red Sea were cut, likely by a ship's dragging anchor, leading to widespread internet slowdowns across Asia, the Middle East, and Africa. SINGAPORE – Asia Piling, a company involved in many public and commercial projects here, is the sub-contractor that hit critical underground fibre-optic cables, causing a 20-hour broadband outage to more than 5,000 households on April 18. In naming the sub-contractor, the Land Transport Authority. UN Tech Agency Moves to Protect Submarine Cables as Tensions [.] Taiwan Activates Backup Communications for Outlying Island After Undersea Cable [.] Chinese. Rising West Asia tensions spark fears of Red Sea cable damage, risking internet disruptions in India and globally due to heavy reliance on undersea networks As conflict in West Asia intensifies, concerns are growing over potential disruptions to global internet infrastructure, particularly undersea. The Strait of Hormuz is famous for oil. About a fifth of the world's energy supply passes through it, which is why every conflict in the region sends crude prices spiraling. Many fiber internet problems come from dirty connectors or loose plugs, not major faults. Power. Fiber optic troubleshooting is an essential skill for network administrators, technicians, and engineers responsible for maintaining and repairing fiber optic systems.
