

What does FC optical module mean

Overview

FC, The abbreviation for Ferrule Connector or Fiber Channel. While single mode cables still use FC, it is unusual to see them on multimode cables. The FC connector is a fiber-optic connector with a threaded body, which was designed for use in high-vibration environments. They are small, often overlooked components, yet they are essential for ensuring high-speed, low-loss, and reliable optical transmission.

Designed to be simple to use and inexpensive to produce, SC uses a push-pull design similar to LC but utilizes a locking tab instead of a latch to secure the unit.
