

What is the price of power fiber optic cable splicing

Article Overview

Fusion splicing typically costs \$50-\$150 per splice, with equipment ranging from \$3,000 to \$15,000, while mechanical splicing is cheaper but less reliable.

Per-Splice Costs

- **Fusion Splicing:** The most common method for power fiber optic cables, fusion splicing costs \$50-\$150 per splice point, depending on fiber count, site conditions, and project size. Large projects with high fiber counts can reduce the per-splice rate through volume pricing .
- **Mechanical Splicing:** Generally less expensive upfront, mechanical splicing is used for temporary or emergency repairs but may result in higher signal loss .

Equipment Costs

- **Fusion Splicer:** \$3,000-\$15,000 depending on model and features, with high-end models offering automatic alignment and real-time splice loss estimation .
- **Fiber Cleaver:** \$500-\$2,000 for precision cutting of fiber ends before splicing .
- **Mechanical Splice Kit:** \$100-\$500 for alignment fixtures and tools .

Factors Affecting Cost

- **Fiber Count:** Higher fiber counts per cable reduce per-splice cost due to efficiency in ribbon splicing .
- **Site Conditions:** Aerial splicing is cheaper than underground vault work, which ma...
