

Where are cable trays manufactured most frequently

Article Overview

Asia Pacific is the leading region for cable tray manufacturing, followed by Europe and North America, with significant production also occurring in South America and the Middle East.

Regional Manufacturing Overview

Asia Pacific dominates the global cable tray market, accounting for over 40% of production in 2025, driven by rapid industrialization, construction growth, and expansion of data centers and renewable energy projects . Countries like India, China, and Southeast Asian nations host numerous manufacturers producing ladder, perforated, wire mesh, and FRP cable trays . The region emphasizes cost-effective, high-volume production to meet both domestic and export demand. Europe is known for high-quality, advanced cable tray systems with strict compliance to EN 61537 and ISO 9001 standards . Leading manufacturers include Niedax Group (Germany), Spina Group (Italy), and Legrand (France), specializing in durable, sustainable, and easy-to-install solutions for industrial, transportation, and construction sectors. North America has a strong manufacturing presence, with companies like Atkore and Snake Tray producing aluminum, steel, and wire mesh trays for commercial, industrial, and data center applications . The focus is on innovation, modular systems, and corrosion-resistant designs. South America is an emerging market, with manufacturers such as Industrias Proa S.A. (Argentina) providing climate-resistant and durable cable trays for industrial and energy projects . Production is growing alongside infrastructure and energy sector expansion. Middle East and Africa have smaller but specialized produ...
